
5 Administration Tools

StateView, Version 4.02.00, 2011-07-15

StateView does not provide an **Administration** menu. The **Data** menu does allow call data to be viewed. StateView is sufficient for many users.

Use the CWRAT program if you are a State of Colorado employee involved in water administration. CWRAT allows editing of calls and provides the Water Information Sheet tools for performing daily water administration.
